

Quarter 4 Sketchbook Assignments

Mr. Weisbrod

Food Items: Due 5/16

Take 2 *different types* of food items (fruit and a vegetable, or bread and blueberries), and place them in a bowl. Place it next to a window or strong light and zoom in on the items. Look at the textures and the shadows and how the objects overlap. Draw a FULL VALUE STUDY of the objects. **Sketches without values (i.e. line drawings) will not get full credit.**

Old Technology: Due 5/23

Look for the oldest piece of technology you can find in your house. *Really* old (not a computer or iPod)! Find something like an old typewriter, or a gardening tool. Place it next to a window or strong light in order to get well-defined shadows and highlights. Then zoom in on one particular portion of the tool and then draw it, with FULL VALUES. **Sketches without values (line drawings) will not get full credit.**

Self-Portrait: Due 6/6

Look at your own face in a mirror. Put a your face near a strong light coming from **the side**, at an interesting and somewhat unusual angle. (The light must be coming from somewhere other than above your face!) Do a full-page **value study** of your own face with unique lighting. **Sketches without values (i.e. line drawings) will not get full credit.**
